

CERNER COMMAND CENTER

Gain systemwide awareness with centralized operations

Health care organizations face accelerating cost and revenue pressures. Operational and clinical inefficiencies increase cost, impact clinical outcomes and can impact access to services.

Operational benefits

The Cerner Command Center dashboard provides actionable data insights that help enable effective management of resources and processes to improve health system operations.

- ✓ Visibility to enterprise patient throughput challenges
- ✓ Predictive intelligence to anticipate and coordinate resource needs
- ✓ Near real-time enterprise data to help optimize care coordination and improve care quality
- ✓ Length of stay optimization, capacity creation and load-balancing across the enterprise

Situational Awareness with Command Center

- Proactive discovery of bottlenecks that impact departmental and inpatient flow
- Time from discovery to decision to intervention optimized for value creation
- Near real-time care coordination operating in equilibrium
- Ongoing, agile content delivery and customizable dashboard experience for multiple use cases

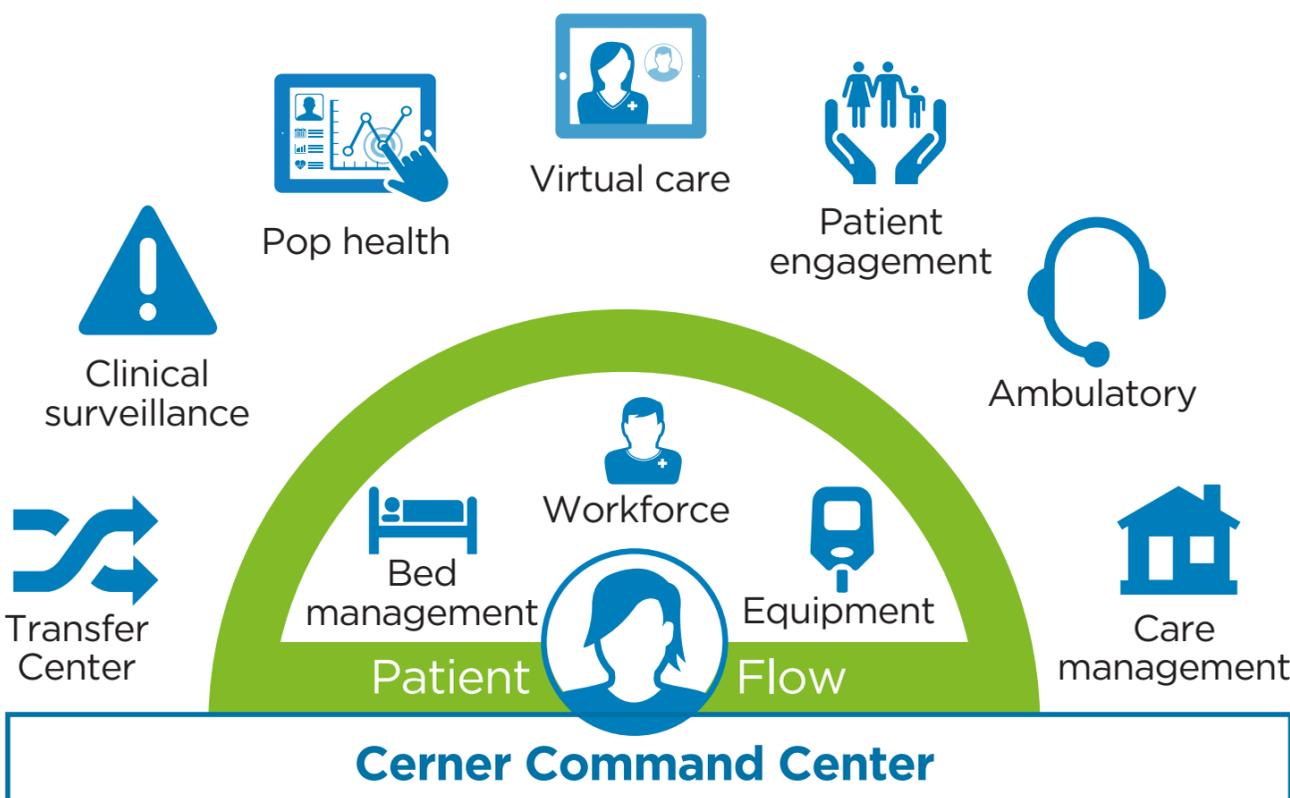

The need for health care systems to have situational awareness has never been greater. The Cerner Command Center Dashboard leverages near real-time data and predictive analytics to provide health systems a clear line of sight into critical resources such as staffed bed capacity, care demand and equipment - information leaders use to anticipate and respond to patient needs.

Centralized Operations

People, process and technology are the three key factors in centralizing operations. Cerner offers advisory services to guide health care organizations when implementing Command Center. The advisory services team can help drive outcomes and reduce costs through operational excellence.

Cerner Command Center provides near real-time enterprise transparency to help health systems perform at their peak efficiency, streamline operations and improve care delivery.

“Our leaders can keep a pulse on what’s going on in the organization – at any time – using Cerner Command Center. It enables us to remove barriers so patients can get the care they need.”

April Giard, VP, CCIO
Northern Light Health
