Cerner Cybersecurity

Protecting at the Enterprise level
We’ve listened and advanced to meet your needs

Protect more. Worry less.
We know security. We also know protecting critical health care infrastructure and patient health information has never been more important. That’s why we offer data protection and enterprisewide system security, so you can focus on what matters most—patient care.

Experience provider-focused data defense you can trust.

Today’s challenges

1. Lack of resources and cybersecurity skills in the health care industry.
2. Limited funding available for an effective cybersecurity program.
3. Established governance risk and compliance program aligning to industry standards.

• Specific solutions and technology feed into effectiveness of an overall cybersecurity program

Technology and solutions help protect enterprisewide data for a customized cybersecurity program, tailored to meet your needs.

Cerner Cybersecurity Technology

Assess
• HIPAA SRA
• NIST
• Penetration testing

Remediate
• Traditional
• Medical
• Mobile

Steady state
• Managed Security Services Provider (MSSP)
• Security Information & Event Management (SIEM)
• Security Operations Center (SOC)
