

Delivering excellence across the continuum

Cerner RevElate Patient Accounting is designed for your next-generation revenue cycle.

The solution creates an open, extensible, enterprise technology designed to give your organization an innovative advantage. Completely redesigned around an event-driven information ecosystem, Cerner RevElate™ Patient Accounting is scalable, flexible and agile, enabling you to integrate other workflows and data solutions for clinical and revenue cycle efficiency.

When my team first saw the demo of Cerner RevElate, I recognized that **this is going to allow my team to focus on more complex issues and work smarter.** We also saw some of the smart workflows inside of the product that will really help take the guessing game out for our team because we can use the smart workflows to direct the rep to follow the right process to resolve a denial depending upon the payer.

Christine Sturtevant
Associate Administrator
Charleston Area Medical Center

Enterprise

- Provides enterprise revenue cycle management that facilitates billing across the continuum of care
- Delivers workflow automation to drive automated action throughout the life of a receivable
- Uses analytics that align KPI measurements to industry standard Healthcare Financial Management Association (HFMA) MAP keys

Connected

- Embeds contract management and claim rules to enable payer-specific intelligence upstream in the workflow
- Offers enhanced abilities to connect with third-party tools to provide increased extensibility and speed-to-innovation

Results

- Provides payer intelligence that monitors payer reimbursement over the course of the revenue cycle
- Enables operational efficiency via deep automation, exception-based workflow and embedded analytics

Frequently asked questions

Q: Why is Cerner moving to a new patient accounting system?

Cerner is committed to advancing the clinically driven revenue cycle. *Cerner RevElate* Patient Accounting preserves existing clinically driven revenue cycle capabilities while also advancing critical patient accounting capabilities. The architecture not only allows you to connect clinical and financial data but also third-party workflows and outside content to help simplify your end-user workflows across a clinically driven ecosystem.

Q: How does *Cerner RevElate* Patient Accounting integrate with other systems and programs?

Cerner RevElate Patient Accounting is an open and extensible platform based on event-driven orchestration enhanced with service-based integration technology. This means that you are no longer limited by the source of data. This model has transformed other industries and is called Integration Platform as a Service – iPaaS. In this model, what's important is HOW data is being used, not WHERE it comes from.

Q: How will *Cerner RevElate* Patient Accounting affect patient experiences?

Cerner RevElate Patient Accounting is designed to make the patient experience consistent across venues by centralizing processes, enabling access to a range of data sources and the creation of custom automation. By breaking down data silos, *Cerner RevElate* Patient Accounting creates a more clinically driven workflow by bridging the front- and back-office access to more information and improved efficiencies.

Q: How does *Cerner RevElate* Patient Accounting empower provider experiences?

Cerner is bringing forward cross-venue, patient accounting capabilities derived from our *Soarian*[®] platform and coupling those with upstream billing intelligence – all surrounded by a one-Cerner user experience. Then we layer onto that an extensible integration platform that allows you to reach across your technology ecosystem so you can leverage certified Cerner third-party vendors as well as your own third parties in new, innovative ways.

Q: What is the timing for implementation? What resources will I need?

Cerner will roll out *Cerner RevElate* Patient Accounting in phases. In order to create a smooth transition, we will work to prepare our clients while creating a customized, realistic resource and implementation timeline. Please contact your client account representative to learn more.

Q: How do I plan for implementation?

As you begin to think about implementing *Cerner RevElate* Patient Accounting, you can take early steps to prepare:

1. Optimize existing systems to ease the transition.
2. Start your evolved patient access transition with an Engage and Access uplift.
3. Engage with third-party automation vendors to plan for an integration with *Cerner RevElate* Patient Accounting.

For more information, please reach out to your client account representative, visit cerner.com/revelate or email revenuecycle@cerner.com.
