

Rapid deployment of *CareAware CareView*TM

A dynamic alternative to discharge progression

To help organizations manage operational efficiency during COVID-19, Cerner is offering rapid deployment of the *CareAware CareView*.

The need for health care systems to have visibility to patient details has never been greater. *CareAware CareView* helps improve communication and eliminate documentation redundancies. The solution is designed to be used by the entire interdisciplinary team throughout the day and during rounds to address barriers to discharge and emphasize a patient-centered focus of care.

CareAware CareView

Opportunity: With the COVID-19 pandemic, it is critical for organizations to have near real-time visibility to discharge progression and clinical information for patients.

Operational benefits

- Rapid deployment of *CareAware CareView* for COVID-19 response
- Helps organizations manage barriers to discharge
- Provides clinicians the ability to add key information as appropriate
- Integrates with *Cerner Millennium*[®] to display near real-time patient information
- Provides visibility to patient details with touch screen integration for easy updating

Solution: The Cerner Health System Operations team can provide advisory services combined with the technology of *CareAware CareView* to assist in the management of discharge progression for patient populations on a unit-level. Cerner has designed a rapid deployment model for *CareAware CareView* to address urgent needs for visibility to patient information and barriers to discharge.

Timeline: The core functions for *CareAware CareView* can be deployed in a matter of weeks dependent upon core solutions sets and current code versions and dependencies in place.

Requirements:

- Cerner Millennium® 2012.01.x
- CareAware iBus® 6.2.4 or higher
- The current infrastructure and solutions in place will be assessed for available capabilities in *CareAware CareView*.
